

Levelogger Software

Solinst always recommends using the latest software and firmware release. Current releases can be downloaded at any time, free of charge, from the Solinst web site at: <http://www.solinst.com/Downloads/>

This compatibility table is for the identification of the minimum software and firmware compatible with each Levelogger Model. For discontinued previous generation Levelogger Models, the latest compatible software version is stated.

Note: Previous Levelogger Software Versions are compatible with Windows 98, 2000, XP, and 7. **Versions 4.0.0 and up are not compatible with Windows 98 or 2000.**

3001 Leveloader

Data transfer device designed for use with Solinst Levelogger Series. Free firmware upgrades are available to ensure your Leveloader is compatible with our current Levelogger versions.

(Feb 2007)
