## LevelVent: Hardware Compatibility

### Recommended Firmware & Hardware Configurations

Solinst always recommends using the latest software and firmware release. Current releases can be downloaded at any time, free of charge, from the Solinst web site at: [https://downloads.solinst.com/](https://downloads.solinst.com/)

Always use the latest Levelogger® PC Software version to install the latest Firmware versions.

**Note:** Solinst always recommends that our customers download the data from their LevelVent loggers, using the same Levelogger Software version they were originally programmed with.

### Operating System Requirements

Levelogger PC Software Versions 4.6.3 and up are compatible with Windows 10 & 11.

### LevelVent Accessories

Older style Vented Cables (sold before 4/16/21 with serial numbers lower than 506326) are not compatible with newer style LevelVent 5 Wellheads (sold after 4/14/21 with serial numbers 495959 and up) and Loggers (sold after 4/5/21) without a small user modification – contact Solinst for instructions. Newer style Vented Cables are compatible with all versions of the LevelVent Wellheads and Loggers – please note, after the new Vented Cable connector is fully tightened, the external o-ring on an old Logger or Wellhead is visible and it is normal not to seat against the connector. USB PC Interface Cables are compatible with all LevelVent versions.
